Cars have problems.

Everyone has insurance on their vehicles to protect them in the event of an accident. However, do you know that less than 20 percent of people ever need to use their collision insurance? On the other hand, nearly every vehicle will require repairs. An average engine costs $7,349 to repair and the average transmission costs $3,911. While these represent the major components, minor parts can still cost anywhere from $300 to $3,000.

The question you need to ask is simple: do you want to pay for these huge repair costs or would you rather someone else pay it for you? With a Veritas vehicle protection plan, we pay the costs so you don’t have to. In many situations, the cost of a single covered repair pays for the entire protection plan!

A mechanical breakdown can be very stressful, not only costing you money but time. This is why all our protection plans come with emergency roadside assistance, first day rental car benefits, and travel interruption coverage included at no extra cost.

With a Veritas protection plan, you have someone to call if you are ever stranded by a breakdown. We will put you in a rental car and most importantly, cover the cost of your repairs to get you back on the road. We provide you with peace of mind, knowing your vehicle is covered by a company backed by an “A” rated insurer, with an “A+” rating from the Better Business Bureau, and a reputation for providing the best customer service in the industry.

All of our protection plans are accepted at any ASE certified dealership or mechanic in the United States.
