# Paint and Interior Coverage for Your Vehicle!

*Environmental Paint & interior Protection is a one-time application that provides protection for the interior and exterior of your vehicle. It provides coverage not offered by the vehicle manufacturer and keeps vehicles looking showroom new for many years.*

## Exterior Coverage

Protects against the assaults from the environment like acid rain, tree sap and bird droppings. Additionally, our exclusive protection acts like a sunscreen for the factory paint to keep it from fading, chalking and losing the gloss and luster that made the vehicle look so beautiful the day it originally rolled onto the showroom floor.

Protects against:

- Fading
- Chalking
- Acid rain
- Tree Sap

## Interior Coverage

Protects the interior leather, vinyl and fabric from fading, soiling and everyday spills. Everybody vows they won't take food and drinks into their new vehicle, but vows are broken within weeks. Hot coffee is spilled, milk and juice boxes turned upside down, and pets and dirty boots and shoes add to the demise of the unprotected interior. Again, a one-time application of vinyl/leather protection and another product to protect the carpet and fabric. Plus, protection is available for up to 5 years!

Protects against:

- Everyday spills
- Fading
- Soiling

## Coverage up to \$2,500 for up to 5 Years!

This brochure is not a contract but an outline of the Environmental Paint & interior Protection program. See your contract for exact terms, coverages and exclusions.
